

UNIVERSITAS TRISAKTI

SUSTAINABILITY/CLIMATE ACTION POLICY

As a "one stop learning for sustainable development" university, Universitas Trisakti is committed to advancing sustainable development and contributing to the global fight against climate change. Universitas Trisakti supports the Government of Indonesia in meeting the targets of 17 sustainable development goals by 2030. Universitas Trisakti also follows the Government of Indonesia's climate action policy for Net Zero Emissions by 2060 or sooner through greenhouse gases reduction and low carbon development.

Universitas Trisakti will reduce the carbon footprint and address climate change through initiatives in education and curriculum, research and innovation, operational and administration, and community engagement.

Universitas Trisakti will plan, implement, monitor and/or evaluate all programs related to energy and climate change, namely energy-efficient appliances usage, smart buildings/automation buildings/intelligent buildings, renewable energy usage, total electricity usage, energy conservation programs, elements of green buildings, climate change adaptation and mitigation programs, greenhouse gas emission reductions, and carbon footprint reduction, sustainable transportation options, robust waste reduction and recycling programs, sustainable procurement, water conservation.

Universitas Trisakti recognizes the complexity and interdisciplinary nature of sustainability and climate change education and research and aims to cultivate the next generation of sustainability leaders with a positive impact on local and global communities by promoting sustainable practices and creating a more resilient environment.

Jakarta, 14 April 2025

Rector

Prof. Dr. Ir. Kadarsah Suryadi, DEA
